Reprisal.

So far as the public knows, the proof of the German allegations about what are called the Baralong murders is not of the most conclusive character. Sir Enwarn Grev's offer to submit the facts to the arbitration of a neutral board of American naval officers, together with the facts in certain other cases of alleged brutal violation of the rules of naval warfare, does not indicate that the affidavits of the American muleteers are credited by him.

The cry for "vengeance for the Bar slong murder" by means of swift and impressive reprisal comes from the German newspapers and from individual members of the Reichstag. The nearest approach to an official threat of reprisal is contained in the utterance of the Under Secretary of the Foreign Office, in the Reichstag on Saturday. "The Government," said Herr ZIMMERMAN, as reported by way means to punish the revolting deed sharply and impressively."

Let every friend of Germany and of humanity hope that the reprisat now in contemplation at Berlin may with the Baralong affair.

Whatever may be the technical right of reprisal, the quality of the evidence in this case does not warrant the ruthless application of the principle of life for life. If there is principle of life for life, If there is life following:
